- Asset quality is strong, with the portfolio remaining well-positioned with resilient credit performance. The impairment charge of £273 million and asset quality of 9 basis points in the year to date reflect stable credit trends.

How are you addressing the competitive threat posed by the rise of fintech and challenger banks?

- We are well positioned to continue our market leadership across multiple markets and deliver on our ambition to grow.
- We have a strong customer franchise and core capabilities including credit decisioning and market leading efficiency, which is increasingly important given inflationary pressures.
- We are the UK's largest digital bank, and now have 22 million digitally active customers, up 21 per cent since 2021 and significantly exceeding our 2024 target of more than 10 per cent growth. This creates significant opportunities to deepen our customer relationships using data and insights.
- Our multi-brand strategy allows us to compete effectively in intermediary driven markets, where we have headroom to grow as we improve our capability with technology investment, particularly in our pensions and protection businesses.
- We continue to invest in front-to-back digitisation of our SME bank, and in our core strengths in cash, debt and risk management within corporate and institutional business.
- We have also increased our focus on collaborating with fintech during the year to broaden our product capabilities, for example a partnership to enable digital invoice financing and factoring for our SME bank clients.

Do you have an update on the FCA motor finance review?

- The Group took a £450 million provision in the fourth quarter of 2023. There have been no further charges relating to the potential impact of the FCA motor finance review in the third quarter of 2024.

Why are you buying back shares?

- Alongside the Group's Full Year 2023 results, the Board announced an ordinary share buyback programme of up to £2.0 billion.
- In the event of future share buybacks, you would generally expect the Group's share count to reduce. Share buybacks can be an effective use of excess capital. It is expected that shareholders who retain their shares in the company will benefit from the share buyback programme as they will own an increased proportion of the total shares in the company and should therefore see an increase in the dividend per share going forward given the reduced number of shares in issue.

How is the share buyback progressing?

- The share buyback scheme began in February 2024, with 2.8 billion shares (worth c.£1.5 billion) bought back and cancelled by the end of September 2024.
