Context

At Lloyds Banking Group (the Group), our purpose is Helping Britain Prosper. As the UK's largest financial services provider, we have an important role to play in creating a more sustainable and inclusive future for people and businesses, by shaping finance as a force for good. Given our unique position at the heart of the UK economy, we embrace our responsibility to help address some of the biggest economic, social and environmental challenges that the UK faces.

We are committed to operating in accordance with the International Bill of Human Rights¹ and take into account a number of other international standards when developing our sector statements, including the UN Framework and Guiding Principles on Business and Human Rights, and other internationally accepted human rights standards including the OECD Guidelines for Multinational Enterprises and the International Labour Organisation Declaration on Fundamental Principles and Rights at Work. Furthermore, *clients* must comply with all applicable laws and regulations and we expect them to respect the human rights both of their own workforce and those in their supply chain.

Scope and Approach

These statements apply to the specific *client* entities that have a *direct lending* relationship with the Group including direct loans within Scottish Widows.²

Where our Insurance business invests its own funds or customer funds in assets traded in the public markets, these statements do not apply, and instead we use professional third party asset managers. For our mandated funds where we have full control over investments, our asset managers are required to follow the Scottish Widows Exclusions Policy and the Scottish Widows Stewardship Policy as applicable. The overall ambition of these policies is consistent with the ambition of these sector statements, which is to align lending and investments with the transition to a sustainable and low-carbon economy, thus reducing our exposure to Environmental, Social and Governance (ESG) related risks.

Furthermore, either directly or through third-party asset managers, we have the ability to use our position as asset owner to challenge the behaviour of the companies in whom we are invested to behave more sustainably and responsibly. Our Responsible Investment team exercises governance, oversight and monitoring of managers on their stewardship activities and outcomes through regular quarterly meetings and reporting. Additionally, on our priority themes, Climate Change and Carbon and Board Diversity, the team also engages directly on our most material holdings and through relevant collective engagement opportunities.

We regularly review all of our *clients* with whom we have a *direct lending* relationship, and where they appear to be operating below our requirements, we will work with our *clients* to understand how they plan to transition to meet these. Compliance with these statements forms part of our overarching ESG risk assessments and credit decisioning process, including any new or extended *direct lending* relationship with the *client*.

¹ Comprising the Universal Declaration of Human Rights, the International Covenant on Economic, Social and Cultural Rights and the International Covenant on Civil and Political Rights.

² Sector statements are applicable to clients where we can identify client activity by their standard industry classification (SIC) code (excluding automated decisioning for smaller counterparties, currently for new lending of £100,000 or less). Forestry and Agricultural Commodities, Animal Welfare and UNESCO World Heritage Site statements are not sector specific.

Risk Management

As a Group, managing risk effectively is fundamental to our strategy and future success. Our approach to risk plays a key role in the Group's strategy and is founded on an effective control framework, which guides how our colleagues work, and behave and the decisions they make. As part of this framework, risk appetite – the amount and type of risk that the Group is prepared to seek, accept or tolerate in delivering our Group Strategy – is embedded in policies, authorities and limits across the Group. Our prudent risk culture and appetite, along with close collaboration between the Risk Function and the Business Units, supports decision making.

Addressing the potential impacts of climate change, how our *clients* are engaging with the opportunities and challenges created by climate change and the need to transition to a low-carbon economy plays a key role in our risk management approach to sustainability. We consider wider ESG risks beyond climate in our current practices and this continues to evolve. We have a range of external sector statements that apply to the Group's activities, which reflect the approach we take to the risk assessment of our *clients* related to climate change and other ESG issues.

Client Monitoring and Due Diligence

In all sectors *clients* must comply with all applicable laws and regulations. If we become aware that a *client* has breached any applicable international, regional or national laws, we would require the *client* to implement action plans that aim to address and resolve such breaches.

Where appropriate, we have regular meetings / engagements with our *clients* with whom we have a direct lending relationship, and regularly review their public filings, press reports and analyst presentations. We ensure that ESG-related risks are considered for all Commercial Banking *clients* with whom we have a *direct lending* relationship, with specific commentary in new and renewal credit applications where total aggregated hard limits exceed £500,000 (excluding automated decisioning processes and digital or telephony applications for smaller counterparties). For project financing activity, the Group is also a signatory to the Equator Principles and ensures they are applied to all relevant transactions.

As part of our control framework and to monitor *client* adherence to our sector statements, we have a number of ESG Risk Management processes in place, which are outlined in the Risk Management section of our sustainability report. These include processes for assessing counterparties and transactions in relation to environmental risks including both climate and nature considerations alongside social and governance considerations. To assess these risks effectively we use our ESG Risk Tool which includes bespoke assessments based on specific business units and in some cases based on sector. Defined escalation routes are in place where our ESG Risk Team complete enhanced due diligence and these assessments form part of the credit decisioning process.

Statement Criteria

Our statements outline a number of criteria for our *clients*, which are grouped into the following categories.

Prohibited	Required	Expected	Encouraged
<p>Mandatory criteria that clients must not be breaching at the organisational or project / transaction level as relevant.</p>	<p>Mandatory criteria that clients must meet at the organisational or project / transaction level as relevant.</p>	<p>Non-mandatory criteria we expect clients to meet or to comply with over time.</p>	<p>Non-mandatory criteria we encourage clients to consider, given industry best practice.</p>
<p>Example: “We will not provide financing to...” “We will not provide direct financing...” “We will not provide project specific finance...”</p>	<p>Example: “We will only provide financing to...”</p>	<p>Example: “We expect clients...”</p>	<p>Example: “We encourage clients...”</p>

Words in *italics* are defined in the Glossary table and clarify the intended scope of certain words in this statement.

The background features a dark green gradient with large, flowing, organic shapes in a lighter green and black. The shapes are layered, creating a sense of depth and movement. The text is centered horizontally and vertically within the composition.

Animal Welfare

Context

We recognise that there are several risks associated with animal welfare and that as a financial services provider we can be connected to potential adverse impacts on animal welfare, and that animal welfare could potentially be adversely impacted in several of the sectors in which Lloyds Banking Group is active.

Scope

Our approach covers the following activities:

- Wildlife and *endangered species*
- Animal testing and biotechnology
- Processing or trading of fur products
- Animals and entertainment.

Company Level Criteria

Prohibited

We will not provide financing to clients that:

Wildlife and endangered species:

- Trade in wildlife or wildlife products regulated under CITES³ (focus on endangered categories)
- Trade involving *endangered species* for commercial purposes

Animal testing and biotechnology (see *Permitted Activities* in glossary):

- Perform commercial, non-healthcare related animal testing (including but not limited to cosmetics testing)
- Use of *endangered species* or great apes (gorillas, orang-utans, bonobos, chimpanzees) for testing or experimental purposes
- Perform healthcare related animal testing that is non-compliant with UK, EU, US or equivalent legislation
- Use genetic modification and cloning of animals (or humans) for commercial purposes

Animals and Entertainment:

- Support of any type of animal fights for entertainment
- Use of cetaceans (whales and dolphins) for entertainment
- Organise entertainment events with animals where the Five Freedoms of Animal Welfare are not respected

We also will not provide:

Fur (excludes leather and wool):

- *Financing to new clients directly involved in fur activities* (including capturing or keeping animals for fur, manufacturing, trading or selling fur products)
- New or increased *financing to existing clients directly involved in fur activities*

Expected

We expect:

- Our *clients* to seek to comply with voluntary standards related to animal welfare where relevant

³ Convention on International Trade in Endangered Species of Wild Fauna and Flora (www.cites.org).

**UNESCO World
Heritage Sites
and Ramsar
Wetlands**

Context

Due to the importance of the UNESCO *World Heritage Sites* and the *Ramsar Wetlands*, Lloyds Banking Group will not support projects that damage these areas in the ways outlined below.

Scope

Our approach applies to all projects.

Project Criteria

Prohibited

We will not provide financing to projects that could result in:

- A *World Heritage Site* being placed on the “In Danger” list, unless the World Heritage Committee specifically agrees in advance to that project
- The special characteristics of a *Ramsar Wetland* designated under the *Ramsar Convention* on Wetlands of International Importance being threatened

Glossary

Terms	Definition
Client(s)	Client(s) refers to businesses and does not include individuals.
Finance, financing or direct lending	Finance, financing or direct lending refers to all primary lending activity by the Group including direct loans from Scottish Widows. Passenger or light commercial vehicle leasing activity is not included.
Endangered species	As defined by the International Union for Conservation of Nature (IUCN) Red List of Threatened Species or as defined in any national legislation.
Directly involved in	A client is defined as “directly involved in” an activity if the business has operational or financial control over the activity.
Permitted Activities	<p>Support for clients that develop or manufacture medical products that have perform testing on animals may be considered on a case-by-case basis subject to the criteria below:</p> <ul style="list-style-type: none"> • The activity must be permitted under UK, EU, US or equivalent legislation • The entity must comply with all national laws / regulations where they operate and there must have been no material breaches identified by authorities • All required licences must be in place • All clients are expected to seek to minimise the use of laboratory animals and the number of animals used • Companies/organisations performing animal research must be able to evidence clear policies and procedures for the care, welfare, treatment, sourcing, breeding and transport of animals which include commitment and compliance to the 3R Principles of Replacement, Reduction and Refinement • Companies/organisations that contract animal testing to third parties must be able to evidence that the third party has clear policies and procedures for the care, welfare, treatment, sourcing, breeding and transport of animals which include commitment and compliance to the 3R principles • Businesses engaged in research into the genetic modification and cloning of animals (or humans) must fully meet existing external ethical standards/statements (e.g. Nuffield Council on Bioethics, UNESCO International Bioethics Committee etc)
Ramsar Wetlands	Ramsar Wetlands refers to wetlands that are registered on the List of Wetlands of International Importance, also known as the Ramsar List. Source: Ramsar List
